

기본프로그래밍_Java B-04

There's no mercy for cheating!

The test time is from 9:30 to 10:00

* 필수항목

1. What's your student number?(kopo00) *

2. Write a program to get the calculated result as below[15]. 1) User inputs a formula including an arithmetic operator. 2) The arithmetic operations have to be done not in main method but in external methods that you compose. 3) The data types of the parameter and the return value for the methods depend on the user input but the names of all the methods have to be the same(Hint, method overriding). *

3*2

6

3.5*2.0

7.0

11*1.1

12.1
