

기본프로그래밍_Java B-05

There's no mercy for cheating!

The test time is from 9:30 to 10:00

* 필수항목

1. What's your student number?(kopo00) *

2. Write a program to calculate the two double numbers with using the interface below[15]. 1) User inputs a string formula such as "3.2*7". 2) The data type of the result depends on the input numbers. $3*3 = 9$, $3*3.1 = 9.3$, $4.1+2 = 6.1$ *

```
public interface CalculatorInterface {  
    public double calAddition(double num1, double num2);  
    public double calSubtraction(double num1, double num2);  
    public double calMultiplication(double num1, double num2);  
    public double calDivision(double num1, double num2);  
    public char getOperator(String formula);  
}
```
